

DeGroot
 $k(r) = 1$

Sigmoidal bounded confidence
 $k_\phi(r) = \frac{1}{1 + \exp(\phi_1(r^2 - \phi_0))}$

Bounded Confidence
 $k_\phi(r) = \mathbf{1}_{\{r < \phi\}}$

Smoothed attraction-repulsion
 $k_\phi(r) = \left(1 - \frac{r^2}{\phi^2}\right) \exp\left(-\frac{r^2}{2\phi^2}\right)$
